Caloocan City, Metro Manila | +63 951 259 7599 | [jbpna101@gmail.com](mailto:jbpna101@gmail.com) | [linkedin.com/julyza-peña/](https://www.linkedin.com/julyza-peña/) | [github.com/aizypena](https://github.com/aizypena)

## PROFESSIONAL SUMMARY

Information Technology graduate specializing in full-stack development. Experienced building enterprise systems, blockchain applications, responsive web applications, Android and iOS applications using JavaScript, TypeScript, React, Next.js, PHP, SQL, Java, Kotlin, Swift, Flutter, React Native, Laravel, Symfony, SQL/NoSQL databases. Passionate about building scalable software that solves real-world problems.

## EDUCATION

### FAR EASTERN UNIVERSITY INSTITUTE OF TECHNOLOGY

BS Information Technology

Major in Web and Mobile Applications · Minor in Networking

Manila, Philippines

2026

### KODEGO BOOTCAMP

Intensive program in full stack web development (MongoDB, Express, React, Node.js, MySQL)

Manila, Philippines

2023

## EXPERIENCE

### THE BLOCKLABS, INC. (early-stage startup)

Software Engineer Intern

BGC, Taguig

April 2026 – July 2026

- Co-developed and deployed the GGG (Good Game Guild) Web3 tournament platform, building Soroban smart contracts on Stellar to automate escrow and prize distributions
- Integrated non-custodial wallet payment flows and XLM settlement architecture, enabling instant, low-cost tournament entry and reward payouts
- Implemented automated, multi-sig on-chain result verification workflows to eliminate counterparty risk and tournament payout disputes

### TERATOMO CORPORATION

Software Engineer Intern

Fairview, Quezon City

Dec 2025 – April 2026

- Co-developed an internal payroll management system alongside senior engineers, automating compensation calculations, tax deductions, and paystub generation
- Integrated mapping and geolocation features into an enterprise ERP platform to track, pinpoint, and visualize physical item locations in real time
- Engineered a python script for the Learning Management System (LMS) to search, verify, and report file existence, eliminating manual audit workflows

## PROJECTS

### GGG (GOOD GAME GUILD)

2026

Tech Stack: Next.js, Stellar, Soroban, PostgreSQL

- Architected a trustless tournament management platform on Stellar using Soroban smart contracts to automate escrow, registration, and prize pool distribution
- Built a full-stack Web3 application leveraging Stellar's low-cost transaction layer and XLM integration for frictionless player entry and global prize settlements

### HENSCHA CONSTRUCTION WEBSITE

2026

Tech Stack: Laravel, MySQL

- Engineered a responsive website for a general contractor firm showcasing nationwide civil infrastructure, earthmoving, services, and multi-tier commercial/government projects
- Optimized user navigation and mobile performance across core service offerings, featured project galleries, and direct contact gateways for enterprise clients

### SMI INSTITUTE (LMS FOR TESDA TRAINING CENTER)

2026

Tech Stack: React.js, Express.js, MySQL

- Developed an administrative web portal for a TESDA accredited training center, featuring online program enrollment, document uploading, and real-time application status tracking

- Built student tracking and reporting tools to manage historical enrollment records and generate predictive student intake across 8 NC-II/NC-III certification courses

## NUTRIWISE (E-COMMERCE WEB & MOBILE APP)

2025

Tech Stack: MongoDB, Express.js, React.js, Node

- Awarded Best Capstone Project for developing a cross-platform (Web & Mobile) subscription meal ordering ecosystem powered by machine learning
- Integrated a Body Analyzer tool and Random Forest Classifier algorithm to process health metrics and automatically generate customized meal plans
- Engineered real-time order and rider tracking features alongside automated recurring subscription workflows for seamless delivery fulfillment

## ADDITIONAL

---

### Technical Skills:

- **Languages:** JavaScript, TypeScript, PHP, Python, Kotlin, Swift, Java
- **Frontend:** React, Next.js, HTML5, CSS3
- **Backend:** Node.js, Laravel, Symfony, CodeIgniter, Django
- **Mobile:** Flutter, React Native, Android (Kotlin), iOS (Swift)
- **Blockchain:** Stellar, Soroban Smart Contracts, Web3, XLM
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools:** Git, GitHub, GitLab, REST APIs, Redis, Railway, AWS, Docker
- **AI & Machine Learning:** Random Forest Classifier, AI-assisted Software Development (Copilot, ChatGPT, Claude), LLM

### Certifications:

- **Certiport:** Python, Networking, JavaScript, HTML & CSS, Cybersecurity
- **Project Management Institute**
- **Kodego Full-Stack Web Development**
